TigerTurf™

TigerPlay

A photograph of a child and an adult walking on a colorful circular playground mat. The mat has concentric rings of red, yellow, and blue. The child is in the foreground, wearing a white hoodie and blue shorts, walking away from the camera. The adult is behind the child, pointing towards the right. The background shows a green fence and some trees.

TigerTurf™ Life Range

TigerTurf's synthetic, all-weather, multi-use playing surfaces are fast becoming a standard consideration for early learning centres and schools around the world. These multipurpose playgrounds provide the opportunity for children to be more active, healthy and engaged in activity, enabling kids to play – rain or shine.

TigerTurf surfaces enable centres to accommodate a number of different activities with surfaces engineered to satisfy the fall impact criteria required for each activity.

TigerTurf's market-leading synthetic grass design, build and install teams deliver high quality, customised solutions that will transform school/centre grounds into aesthetically attractive, safe and practical play areas, usable regardless of the weather.

With your investment in a TigerTurf multi use surface you will achieve...

- A brilliantly versatile facility that not only provides multi-use possibilities but also looks fantastic, becoming a focal point of your school and creating a more vibrant school/centre culture.
- A durable, long-life, low maintenance, free draining surface which is playable in all weather – wet or dry, hot or freezing conditions. TigerTurf provides a top-class surface that is available for play when other areas are closed.
- A reduction in playground injuries. TigerTurf's specially cushioned surfaces are less stressful on childrens' knees, ankles and backs, having an important advantage of decreasing playground injuries. Some synthetic grass systems offer an optional rubber shock-pad underlay providing even greater cushioning.
- TigerTurf have a proven performance in playgrounds for over 30 years with thousands of successful installations the world over.

TigerTurf™

TigerPlay

TigerPlay was developed by TigerTurf to specifically meet the recreational needs of pre-school children. It is ideal for all childcare centres, community playgrounds and parks. TigerTurf has created a softer, non-abrasive surface for safer playgrounds. More durable than natural grass, more inviting and interactive than other playground surfaces.

Additional benefits of the TigerPlay system:

- It requires little sand infill which significantly reduces the migration of sand indoors.
- The softer yarn provides a softer 'landing' reducing injuries and grazed knees associated with energetic playground antics.
- Available in a range of vibrant colours meaning you can create unique play areas, incorporating a range of activities and games – customised to complement your facility's vision.
- TigerPlay can easily be laid over existing asphalt or concrete bases or constructed on natural turf areas. Quality design, construction and installation techniques ensure your TigerTurf surface will remain in good structural condition throughout its life.
- TigerTurf's 'One Stop Shop' can manage the entire project from concept to completion, quickly turning cheerless cracked and puddled play areas into vibrant, multi-use, all-weather areas.
- TigerPlay requires very little maintenance apart from keeping the surface free of leaves, debris and organic matter, helping keep maintenance costs down.
- TigerPlay has been tested to meet soft fall to critical fall height regulations. TigerTurf undergo regular independent testing to ensure its products continue to exceed Government safety standards.

TigerPlay comes with a 7 year limited manufacturers warranty.

What our Communities say:

We have had our TigerTurf surface down for a year now and we're delighted with it. It has proven an excellent and functional surface for our preschool environment. Within 30 minutes of a hefty downpour, we can have all the children outside playing on a relatively dry surface, free of slipping hazards and no puddling or muddy messes which would require a mass clean up afterwards. I can thoroughly recommend TigerTurf to anyone contemplating its use in a similar setting. The team at TigerTurf also proved very professional, friendly and efficient throughout the install and on any further follow up.

Justin Edgar — Little Engines Pre-School

The creative possibilities are endless.

Any dull area can be transformed to a hopscotch grid, a mystical fairy-land or a pirate's battleground. Let TigerTurf's design team work their magic with your space to create something uniquely inspiring.
